

Stop Looking. Start Managing. Centurion CD.

If it's worth saving onto disc,
it's worth protecting with the
Centurion CD.

Everyone knows that CD and DVD are the safest way to store your valuable information, data, files, photos and videos... but what do you use to store, protect and manage your discs? How do you protect them from scratches, damage and loss? How do you find them within seconds instead of days?

Digistore Solutions brings you the industry's first **affordable, simple, safe** and **secure** way to catalogue, store and manage your CDs, DVDs, Data discs and Game discs! The Centurion CD is the fast, easy-to-use disc library solution for home, business, education, corporate and government users alike - connecting to your computer in minutes and safely storing 100 discs per unit (scalable to 127,000 discs!). Get organised with a Centurion CD and find any disc in any unit in seconds!

Stop stashing valuable and expensive discs in drawers, on desks, in filing cabinets and in folders and move to the comprehensive hardware and software disc library solution!

Centurion CD Key Features

- Each unit stores and protects 100 discs
- Stackable to 10 units high
- Expandable to 127,000 disc storage
- Strong and sturdy design
- Search and ejects discs in seconds
- Stores and protects any standard sized discs: CDs, DVDs, Music, Game, Blu-ray and HD-DVD discs

The Centurion CD is the first affordable CD, DVD, Audio CD and Game DVD storage unit for 100 discs that connects to your computer or laptop. Using the bundled software and your computer's CD drive, you can safely and securely manage your entire disc collection.

The clever way to store, retrieve and protect your valuable CDs and DVDs.

MediaTRACKER®

Version 2.0 Lite Software included for Windows and Mac

- Disc content scanning for name, creation date, modified date, size, kind, file type, file creator etc
- Database and search engine for managing CDs and DVDs
- Password protection for all discs
- Date, time and user name stamp for all drawn media
- Eject and launch file automatically using its creating application
- Search up to 10 Centurion CD in a single USB connection
- Auto updating engine to keep the software updated
- Create backup database for ease of transfer or recovery

Protect

The Centurion CD eliminates scratches, fingerprints and dust damage to your discs by storing them safely out of reach; and avoids costly loss of expensive software and valuable personal discs due to misplacement or theft. Administrators can password protect individual disc and entire Centurion CD units (keep confidential or private discs safe and sound).

Ease of Use

The easy to use software manages all connected units through a single interface. You can retrieve any disc from any unit with a single click, and keyword search titles of all CDs (find them first time, every time)!

Manage

Even novice users can store, manage, search, find and eject any disc in any connected Centurion CD within seconds. Mixed discs can be stored in a single unit (store CDs, DVDs, audio discs and game discs all in the same Centurion CD - no need to buy different units for different discs).

Tracking

The included software enables users to track and report who has which disc, and

provide due date reminders. Compulsory tracking tools can be implemented preventing users from removing discs unless they enter the appropriate details (can be activated or deactivated by administrator).

Scalability

Expandable to meet growing needs, additional Centurion CD units can be stacked on top for instant access without additional cables or cords. Stacks can be 10 units high and store 1000 discs, expandable to 127,000 discs!

Future Proof

The Centurion CD has no redundant disc readers (it works with the CD/DVD drive in your computer) making it future-proof - the Centurion CD will work with all current and future 120mm CD or DVD styled discs (optional CD sleeve adaptor for 80mm) ensuring you get many years of use!

Quality

Invented and manufactured to Defense Department standards, Centurion CD is extremely sturdy and utilises custom 8-bit RISC processor driving advanced micro-robotics, and is backed by a comprehensive 12 month replacement warranty.

Technical Specifications

Dimensions

Max. Diameter: 312 mm (12.3 in)
Max. Length: 425 mm (16.7 in)
Max. Height: 187 mm (7.4 in)
Weight (empty): 1.8 kg (3.9 lbs)

Capacity

Disc Capacity: 100
Disc Dimension: 120 mm (5.25 in)
80 mm (optional CD sleeve adaptor)

Robotics

CD Ejection Time: 7 sec
MTBF: > 3 million cycles

Operating Environment

Ambient Temp: +7°C ~ +30°C
Ambient Humidity: 90%

Power

Power In: 100~240V AC, 50~60Hz
Power Out: 9V DC, 1.0A
Current Draw: 0.30A
Peak Current: 0.60A

Connections

Interface: USB 1.1 compatible
Stacking Port(s): RS232 / Power

System Requirements

Hardware: Pentium II or G3 Processor, 64 MB RAM, 200 MB Harddisk space, USB 1.1 or 2.0 compliant port, CD or DVD drive
Operating System: Windows® XP, 2000 Mac OS X v10.4 & above, Mac Universal

Compliance

USA: FCC
Europe: CE, ROHS
Australia: C-tick
